

Direct Routing

Pure IP delivers Direct Routing for Microsoft Teams using either local SBCs or our cloud hosted SBCs with no hardware on site. We handle complex migrations and legacy systems so deployments stay clear, scalable, and fully supported.

What sets us apart

As one of Microsoft's most experienced Direct Routing providers, we combine technical depth with global scale to deliver solutions others avoid.

- **Global reach** – PSTN replacement services in 50+ countries, with local compliance expertise.
- **Complex made simple** – Specialists in legacy, analog, and contact center integrations
- **Managed SBC services** – Flexible options to for hard-to-reach locations.
- **Proven migration expertise** – Trusted to handle large, multi-region Teams deployments.
- **24/7 technical-led support** – Proactive monitoring and resolution from skilled engineers.
- **Operator Connect + Direct Routing** – We seamlessly combine both models for maximum flexibility and coverage.

Who it's for

Direct Routing is the flexible way for enterprises to connect Teams to the PSTN. It's for businesses that require:

- **PSTN connectivity** in regions where Operator Connect isn't available.
- **Integration with legacy systems** such as analog devices or contact centers.
- **Greater control** over routing, policies, and call flows.
- **Tailored voice configurations** for complex or regulated environments.

Our Microsoft credentials

Chosen, certified, and recognized by Microsoft to support the world's largest enterprises.

Certified Teams Calling specialists

Advanced Specialization awarded for proven expertise in complex Teams voice deployments.

Global coverage

We provide full PSTN replacement services across 50 countries, giving enterprises a single, reliable partner for global voice.
