

Global Unified Communications SIP Trunk Provider

Pure IP UK Porting Procedure

UK Porting Procedure

Number porting is a change in the CP (Communications Provider) or Current Network Operator (CNO) of the inbound routing of a telephone number. UK number porting is made technically possible by onward routing, where the number(s) to be ported are prefixed by the rangeholder or host network operator for the rangeholder with a number porting prefix for the gaining network operator. When a call is placed to the ported number after the porting prefix has been applied the call is then routed directly to the gaining network operator via the designated points of interconnect agreed under the service establishment between the new network operator and the host network or rangeholder.

As such number porting does not change the Ofcom-allocated RH (Range Holder) of a number, as the calls will usually always route through the RH systems or the RH's host network operator.

Pure IP use BT IPEX (BT IP Exchange) for most UK porting requests for the Pure IP platform. BT IPEX have arguably the widest SE (Service Establishment) with rangeholders and host networks, enabling Pure IP to facilitate the porting of most UK landline and non-geographic telephone numbers, particularly from the larger tier 1 network operators.

Information Provided to Customers

Pure IP will need to obtain the following information:

- Signed LOA (sample to right)
- Recent invoice from current supplier
- Requested porting date - 25 working day lead time

(UKP Letter of Authority)
Direct Dialling In (DDI) Letter of Authorization

This is to certify you that I (representing the customer shown above) have decided to port the above Direct Dialling In (DDI) or "Virtual" geographic number(s) from you to the Gaining Operator (as shown above).

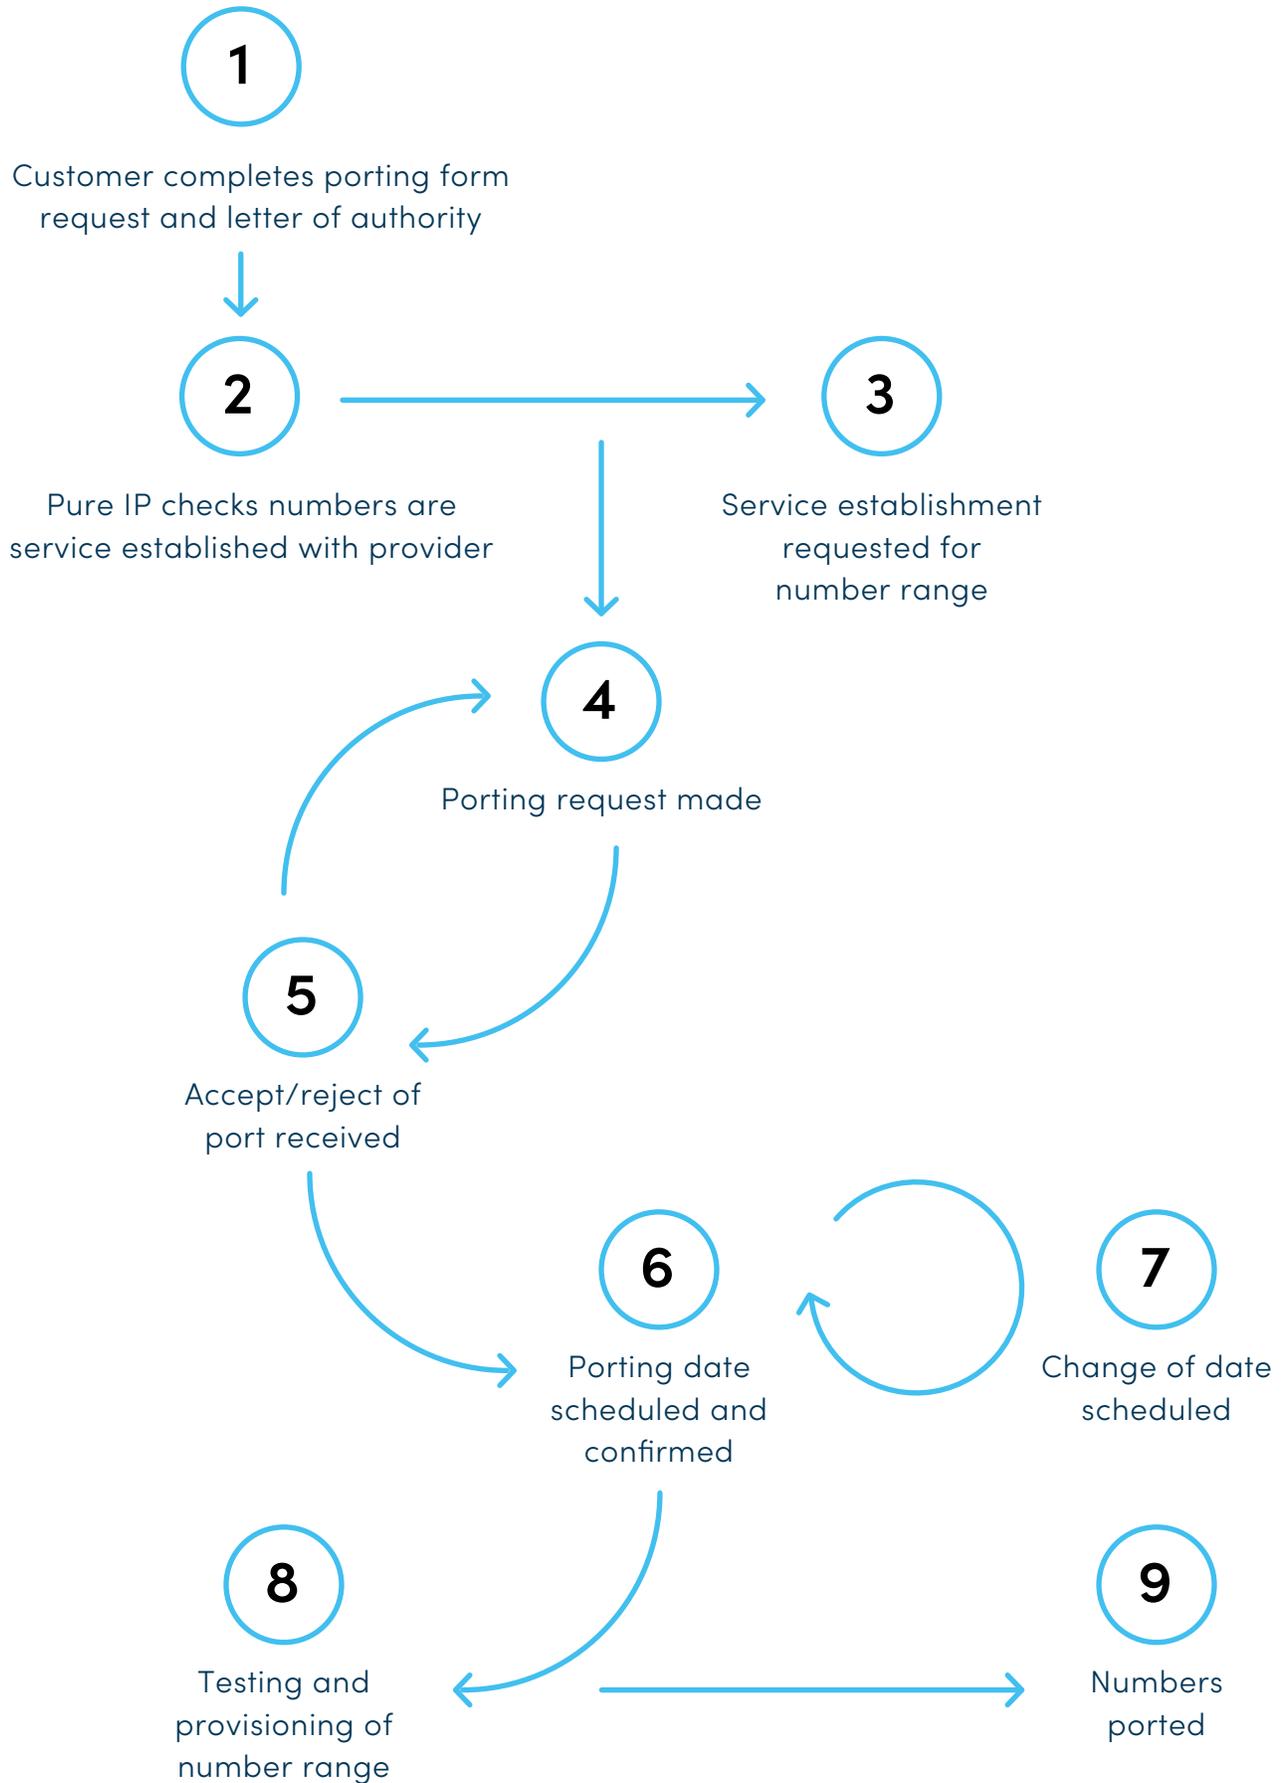

The Gaining Operator is authorized to act on my behalf in this matter. I acknowledge that it is my responsibility to arrange cancellation or changes to any other services currently provided by your company.

You have my authority to disclose to the Gaining Operator such information regarding the "Start Billing In" or "Virtual" geographic area(s) and numbers quoted together with any other numbers as may be necessary to allow the port to proceed.

I hereby agree to the terms and conditions of the Gaining Operator's service.

This also authorizes the Gaining Operator to use the information provided to it for the purposes of its service.
